

Empire Zoysia

About Empire Zoysia

Empire Zoysia is our most popular variety of turf due to its low maintenance nature and appealing dark green colour. It is one of the most tolerant turf varieties and as such, has become very popular in North Western Australia.

Empire has a slow growth rate and therefore does not require the same amount of mowing as other varieties. Slow growth also results in less aggressive lawn and weeds which keeps it neat and non-invasive to garden beds. Despite Empire's slow growth rate, it is still quick to establish due to its deep and fibrous root system.

Empire turf thrives in extreme heat which is perfect for North Western Australia! Empire Zoysia is ideal for various areas from residential yards to golf courses, thanks to its luxurious soft leaf texture. It is also a great lawn choice for children and animals as it is hard wearing.

In Summary

- Very low maintenance
- Appealing dark green colour
- Highly drought tolerant
- High wear tolerance
- Soft to touch
- Thrives in extreme heat
- Good resistance to insects and diseases
- Grows well in sandy soil areas
- Semi shade tolerant
- 6 hours direct sunlight daily
